

GOOGLE ADS PERFORMANCE REPORT

Prepared for Tires SOS Rescue | Reporting period: Last 30 days

TIRES SOS RESCUE

Paid Search Performance Summary

AD SPEND \$498 Google Ads	CONVERSIONS 114 tracked actions	COST / CONVERSION \$4.37 efficient acquisition	CLICKS 765 site traffic
IMPRESSIONS 19.8K ad visibility	CTR 3.86% click-through rate	AVG. CPC \$0.65 cost per click	CONVERSION RATE 11% Google Ads metric

EXECUTIVE SUMMARY

- Google Ads generated 114 tracked conversions from \$498 in spend during the last 30 days.
- The account produced 765 clicks from approximately 19,800 impressions at an average CPC of \$0.65.
- At \$4.37 per tracked conversion, the campaign is generating a high volume of conversion actions relative to spend.

BAYTECH PERFORMANCE NOTE

Conversion value (113) and conversion value / cost (0.227) are included in Google Ads, but should not be interpreted as revenue or ROAS unless the account's conversion-value setup is verified.

PERFORMANCE ANALYSIS

Tires SOS Rescue | Google Ads | Last 30 days

TRAFFIC & RESPONSE

KEY OBSERVATIONS

- 3.86% CTR indicates the ads are consistently generating engagement from search visibility.
- \$0.65 average CPC kept 765 visits within a \$498 media budget.
- 114 tracked conversions at \$4.37 each is the strongest efficiency signal in the current report.
- On Sep 8, the app showed 32 clicks from 590 impressions and a 5.42% CTR - above the 30-day CTR.

RECOMMENDED NEXT STEPS

- 1 Validate conversion tracking**
Confirm which actions make up the 114 conversions and identify qualified leads vs. secondary actions.
- 2 Prioritize high-intent searches**
Shift budget toward keywords and search terms that produce calls, bookings, or roadside-service requests.
- 3 Protect cost efficiency**
Monitor cost per conversion as budget scales and reduce spend on low-intent traffic.
- 4 Improve value measurement**
Assign verified lead or sale values so future reports can show meaningful revenue and ROAS.

CLIENT ACTION PLAN

BayTech Experts -> Tires SOS Rescue

FOCUS FOR THE NEXT OPTIMIZATION CYCLE

LEAD QUALITY

Review conversion actions and call outcomes so optimization is based on real customer inquiries, not just raw conversion count.

SEARCH INTENT

Use search-term data to identify emergency tire, roadside tire, mobile tire, and other high-intent service queries that deserve priority.

BUDGET ALLOCATION

Move spend toward campaigns, locations, devices, and times of day that produce the strongest qualified conversion performance.

AD & LANDING EXPERIENCE

Continue testing messaging and landing-page calls to action to improve click-through and lead completion rates.

MEASUREMENT

Connect verified lead values or booked-job revenue to Google Ads where appropriate, enabling reliable ROAS reporting.

114 CONVERSIONS | \$4.37 COST / CONVERSION

Next goal: improve lead quality while maintaining efficient acquisition.
