

WEEKLY OWNER BRIEF

Website performance

Aug 1-6, 2026 | The few numbers that affect demand, leads, and customer experience.

108

UNIQUE VISITORS

115

SESSIONS

13

MESSAGES SENT

0

RECORDED LEADS

OWNER TAKEAWAY

People are reaching and using the site, but the business cannot yet see a completed appointment or WhatsApp quote in tracking.

What the owner should watch

1

LEADS ARE NOT SHOWING UP

Evidence: 18 contact clicks, 20 chat opens, and 13 messages were recorded, but appointments and WhatsApp quotes both show zero.

Why it matters: The final step may be broken, difficult, or tracked incorrectly. Until verified, marketing ROI cannot be judged reliably.

2

THE EXPERIENCE IS MOBILE

Evidence: 88% of measured device activity was mobile. Mobile Safari and Facebook Mobile together represented 58.7% of measured browser activity.

Why it matters: Any mobile friction affects nearly the entire customer base. Test the quote, chat, phone, and appointment paths on real phones first.

3

TRAFFIC QUALITY IS UNCLEAR

Evidence: 111 sessions were labeled Paid Unknown, and campaign UTM values were missing.

Why it matters: The owner cannot tell which ad, platform, or creative produced useful visits or leads, so budget decisions are guesswork.

Quick health check

Visitor behavior	157 pageviews / 115 sessions = 1.37 pages per session	LIGHT ENGAGEMENT
Customer contact	13 messages from 108 unique visitors	ACTIVE INTEREST

Three actions that matter

Keep the team focused on proving the lead path before spending more to increase traffic.

PRIORIT Y	ACTION	OWNER SHOULD EXPECT
01	Complete one test lead through chat, appointment, phone, and WhatsApp on iPhone and Android. Confirm the customer sees success and the event appears in PostHog.	A verified path from visit to lead.
02	Review at least 10 rage-click recordings. Fix the repeated mobile element or page that causes frustration.	One named issue, owner, and fix date.
03	Add source, medium, campaign, and ad/creative tags to every paid destination URL.	A weekly lead count by campaign.

Owner scorecard

MEASURE	THIS WEEK	NEXT REVIEW
Unique visitors	108	Direction vs. prior week
Messages sent	13	Message-to-lead result
Appointments + WhatsApp quotes	0 recorded	Must be verified end-to-end
Rage-click rate	7.0%	Lower after mobile fix
Trackable paid campaigns	Not available	Campaign names and lead counts

DATA NOTE

PostHog recorded no appointment or WhatsApp quote completions. This does not prove the business received zero leads; it means none were recorded in these two tracked conversion events. Campaign performance also cannot be attributed until UTM tagging is in place.
